- Shredder housing to be opened by hydraulic device
- Rotor to be tilted by hydraulic device, for easy maintenance
- Eject door for unshreddables
- Flexible cardan joint (optional)
- Heavy duty design (65 tons of weight)

BENEFITS

www.sicon-america.com

The EcoShred® Slimtec is the powerful shredder for getting started or smaller capacities.

With the integrated pressing and feeding device even bulky scrap can be processed. In addition, the EcoShred® Slimtec has all the features of much larger machines, such as the segmented floor grate, the liftable rotor or the powerful drive with a safety clutch.

The EcoShred® Slimtec, complemented by the SICON Fe- and NF-Downstream, is a powerful plant for monthly production of 2,000 to 5,000 tonnes of shredded scrap.
