

SICON Trisomat and Variomat

Highest screening efficiency for best results in NF-Downstream

SICON is proud to be the exclusive distributor of IFE Bulk equipment in the Scrap industry. In corporation with our Austrian partner, SICON delivers various highest-quality screens for the non-ferrous downstream

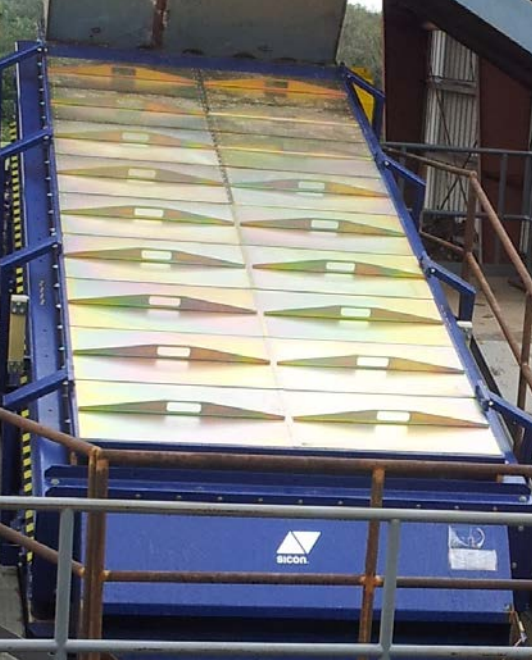

Your benefits at a glance

- Highest screening efficiency
- Best screening results also for material below 5/32"
- Material screening for throughput of up to 100 tph for Auto-Shred-Residue
- No transmission of fines
- Eliminates pokers
- Highly reliable operation
- Heavy-duty built for lowest maintenance requirement
- Additional features available upon request
- Easy and cost efficient integration in pre-existing system

SICON Trisomat

Key Benefits:

- Unique three-dimensional vibration movement "3-phase-oscillation"
- Highest feeding rates
- No pegging or blinding
- Lowest dynamic loads
- Safest operations
- Lowest maintenance
- Heavy-duty built while extremely light weight

Standard features include:

- Inner & Outer screen frame
- Crossmembers steady connection of flexible screen panels
- Stationary screen cover
- Flexible screen panels with mounting strips
- Feeder end part
- Special discharge design for oversized material
- Strong drive shaft with heavy-duty bearings
- High-quality V-belt pulleys, V-belts and named brand motors
- Additional rubber support structure

SICON Variomat

Key Benefits:

- Highest throughput performance
- Maximum screening results with minimal blinding
- No shut-down required for screen cleaning
- Easily adjustable selective criteria for screening
- Minimal maintenance requirements

Standard features include:

- Open screen frame in heavy-duty designed, vibration-resisting steel construction
- Screening deck designed specifically to meet technical specifications
- Strongest Unbalance shaft
- Long-lasting stationary drive motor with articulated shaft, heavy-duty outboard bearing and V-belt drive
- Compact oil-bath lubrication
- Sturdy mounting units
